

Directory listing description template for Receiving sites

This guide explains how to format a directory listing description to meet program requirements for sites that **Receive** or **Send & Receive** referrals.

The description is a key part of the eReferrals system. It provides essential site details in a clear and consistent way to support clinical decision-making.

The information appears on the public Healthmap and supports the eReferral process. Formatting codes are used to ensure clarity, consistency, and proper function.

Note: Only a Site Admin can make these changes.
